FOR
PREVENTION AND ABATEMENT
OF
POLLUTION

NEW YORK STATE
DEPARTMENT OF HEALTH
November, 1965

Approved by the Water Resources Commission

NON-MUNICIPAL SOURCES OF POLLUTION

The following table includes a listing of non-municipal entities known to be discharging wastes through separate outlets into the surface waters of the designated drainage basins in violation of the provisions of the Public Health Law. Abatement of such pollution sources can be made in many of the cases by disposal of the wastes into the municipal sewerage system and subject to pretreatment of the wastes as required by municipal ordinance. In cases where municipal sewers will not be available for a period not exceeding five years and/or where the wastes are not amenable to treatment at the municipal sewage treatment plant, consideration will be given to the disposal of the wastes into the surface waters following satisfactory treatment necessary to comply with the water quality standards adopted for the receiving waters and provided, in each case, plans for such disposal systems have been approved by the State Commissioner of Health.

Representatives of the New York State Department of Health will hold meetings and conferences with representatives of the listed entities, the objectives of which will be generally to obtain action toward the corrections of polluting conditions in accordance with time schedules stipulated for each of the listed entities as determined at the conferences to be held prior to July, 1966.

Name of Entity		Character of	Comments	Receiving Waters	Class
Co.	Drainage Area	Wastes			
Mariners Harbor Industrial Park (Division of JML Trading Corp.) Richmond	#14	Sewage	No treatment provided Employs about 8 persons	Newark Bay	II
Marlyn Warehouse Corp. Queens	#5	Sewage	Untreated sewage from some 25 persons is discharged to the receiving waters	Newtown Creek	II
McInnis Iron Works Queens	#5	Sewage	Effluent from cesspool serving 3 persons is discharged to receiving waters	Newtown Creek	II
Metropolitan Petroleum Corp. Kings	#5	Oil wastes & sewage	Ineffective treatment by oil separators and cesspools, employs about 6 persons	Newtown Creek	II
Metropolitan Petroleum Terminal Co., Inc. Bronx	#1	Oil wastes	Oil separator treatment presently employed is inadequate to meet classification standards	Harlem River	II
Military Medical Supply Agency Kings	#9	Sanitary	No treatment provided. Proposal to intercept wastes into 3rd. Ave. sewer	Upper New York Bay	I
Mobil Oil Co. Kings	#5	Oil refinery wastes & sewage	Ineffective treatment by oil separator and septic tanks	Newtown Creek	II
